

Dear Ms. Sahler,
Dear Shalini,

Thank you very much for consulting UNIDO on essential elements for a possible ICCM-5 high-level declaration on sound management of chemicals and waste beyond 2020.

We as member of the IOMC support the idea that the Dubai Declaration could build the starting point. In addition, we believe the declaration should encourage to follow broader concept that facilitate and assist the sound management of chemicals and waste beyond 2020. These are among others: sustainable and green chemistry, circular economy and green growth. Moreover the role of industry (small and big) should be more prominently mentioned.

Thank you very much for taking our suggestions into account.

We look forward to further deliberation on this important topic.

Kind regards,

Gabi Eigenmann
