

9 March, 2021 - save the date! Workshop “Beyond 2020: Sustainable Chemistry as orientation and pace maker for Sound Management of Chemicals and Waste”

Dear colleague!

On contract of the **Umweltbundesamt** (German Environment Agency), we are running a project aiming at a future-oriented contribution to the Sound Management of Chemicals and Waste (SMCW), by developing proposals for indicators to measure progress towards a more sustainable chemistry and chemicals management. Please find further information in the information leaflet attached.

We started a workshop series to discuss a set of potential indicators to measure the progress towards a more sustainable management of chemicals and waste. **We would like to invite you to the second workshop on March 9, 2021 especially dedicated to experts from East Asia, South East Asia, South Asia and Australia.** There was a first workshop in November, 2020. We will organize further workshops focussing on other areas of the world in 2021 and 2022.

Due to the current restrictions in traveling and coming together we are going to secure an online participation for you with sound equipment to work online

Time: March, 9; 5:00 a.m. to 10:00 a.m. GMT

The starting time corresponds to

- 10:30 a.m. New Delhi
- 1:00 p.m. Bangkok, Jakarta, Hanoi
- 2:00 p.m. Beijing, Shanghai, Hongkong, Singapore
- 3:00 p.m. Tokyo, Seoul
- 5:00 p.m. Melbourne
- 6:00 a.m. Berlin

In order to properly prepare organizational aspects, we kindly ask you to give us a first indication until February, 15 whether you will be able to join us. Please send your answer to [Svenja](#). The programme and preparatory and background documents will be disseminated at the end of February. If you have any questions to be answered by the Umweltbundesamt, please contact [Dr. Christopher Blum](#) (+49-340-2103-3114;).

We are looking forward to your answer!

Kind regards,

Henning Friege (N³)

Svenja Jürgens (Akademie Dr. Obladen)
